

Professional merchandise developer became a Manufacturer

HNHANA Co., Ltd.

About US

Established in 2006, our company has achieved steady growth as a trusted online seller for nearly two decades. Building on years of experience and accumulated know-how, we have recently expanded our business into product development — introducing our own modular and easy-to-assemble chair. We have successfully registered patents in Korea, the United States, and Japan, and are currently filing additional patents in China and Europe. Although we do not operate a domestic manufacturing base, we have established a strong partnership with a reliable factory in China, enabling us to commercialize our modular chair line and launch it in the Korean market.

At present, we are actively expanding into overseas markets, focusing on global distribution and export opportunities.

Our mission is to combine innovation, design, and practicality to deliver high-quality, user-friendly furniture that enhances everyday living. With continuous improvement and a customer-centric mindset, we aim to grow into a globally recognized brand in the modular furniture industry.

Good Design

*Not just the kitchen,
but anywhere in your living space!*

Feature

Simple assembly
easy installation

Durability and Safety
Sturdy steel frame legs

Clean and
sophisticated design

Ergonomic design

The streamlined backrest and plush seat cushion that cradles your hips deliver the ultimate seating experience.

Integrated Leg

The one-piece structure connecting the backrest to the rear legs enhances stability. Two legs are cross-linked to maintain the golden angle of 110 degrees.

Water-resistant PU synthetic leather

Made from premium synthetic leather, it can be easily wiped clean with a damp cloth to maintain hygiene, and its exceptional durability keeps it looking like new for years.

Premium materials

Constructed with premium PU material. Offering a wider selection through distinct patterns per color, this kitchen chair enhances quality with its durability and sophisticated color palette.

Sturdy steel frame

The robust steel frame leg structure provides stable support without deformation.

*Solid wood pattern
film coating*

Add sophisticated elegance!

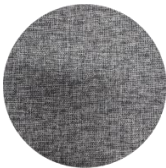

Premium high-elasticity high-density sponge

Featuring premium high-resilience, high-density sponge with excellent recovery properties, it delivers the ultimate seating comfort.

How to Assemble

1.

Before assembling the legs, position both legs as shown in the photo.

2.

Place your left leg inside your right leg, twisting it downward.

3.

From the inner end of the right leg, align the left leg with the mounting bracket while positioning it.

4.

Push the left leg outward while aligning it with the screw hole.

5.

Secure the assembled leg with screws.

6.

Secure the cushion to the leg with screws.

7.

After securing the backrest with screws, insert the holes with buttons to complete assembly!

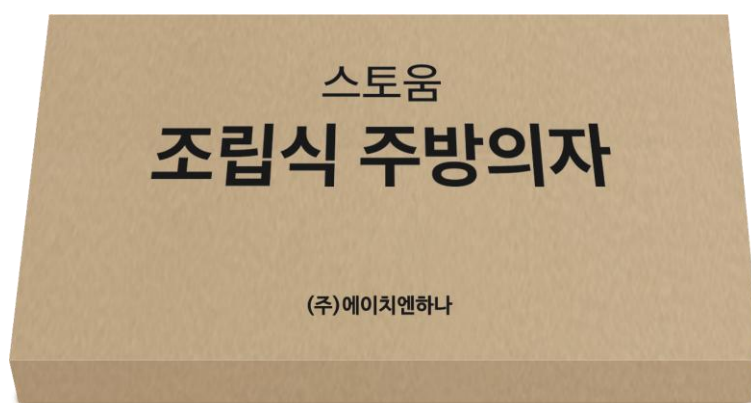

@made by STOME

Package and Components

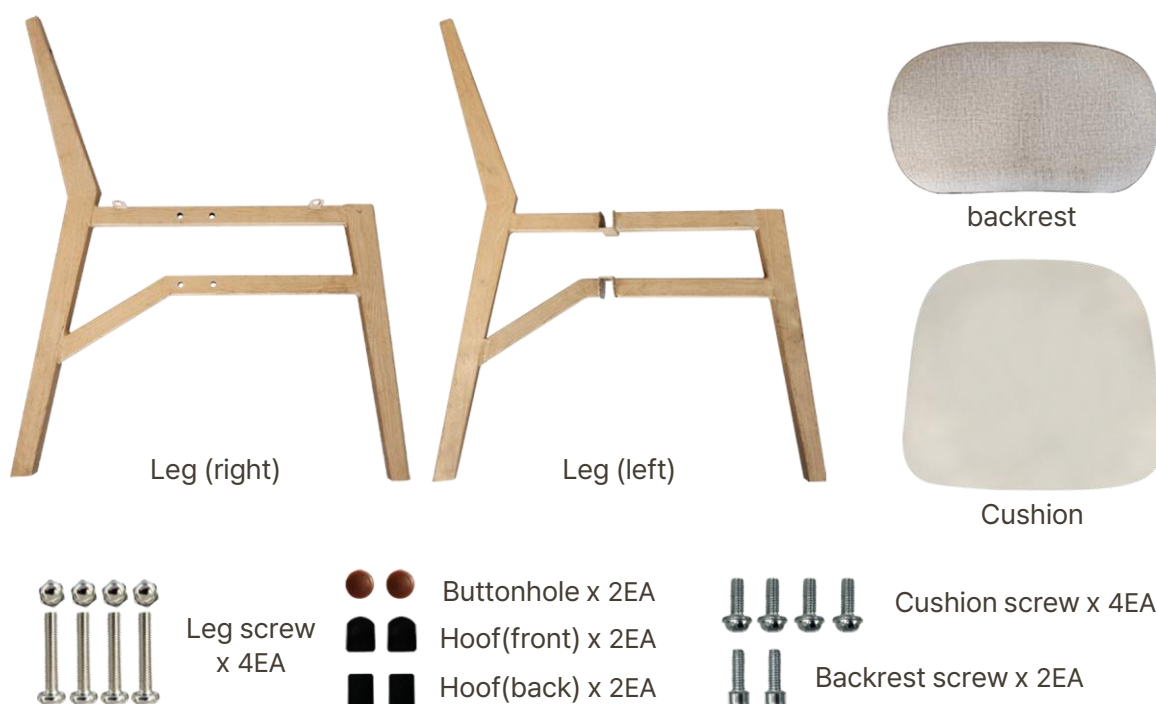

1. Box for easy Delivery

- 860mm(W) x 605mm(D) x 105mm(H)
- 6.74Kg

2. Minimal Component

- Only 2 frames for body

Reviews

Found kitchen furniture that's just perfect for me!

★★★★★ | Rose***

It combines sturdiness and sophistication!

At first, I didn't expect much since it was so affordable, but when I actually received it and assembled it, the finish was clean and the materials were decent. The design is also clean and uncluttered, so it fits perfectly in our kitchen.

★★★★★ | Clai***

Easy assembly instructions that even a woman can handle alone

Honestly, whenever I buy these DIY products, I usually end up getting frustrated while assembling them. But with this one, the parts fit together perfectly, so I finished it much faster than I expected. The instructions were also easy to follow, so even someone like me who's not mechanically inclined could do it without difficulty.

★★★★★ | Lior***

The ultimate value for money, it doesn't get any better than this!

Honestly, for this level of quality at this price, it's a real steal. I've bought expensive furniture before that broke after just a few years. I should've bought this back then. Wish I'd known sooner.
